

BRUSHED METALLIC COWHIDE

PRODUCT CHARACTERISTIC SHEET

PRODUCT DESCRIPTION:

Brushed Metallic Cowhide is aniline-dyed cowhide that is hand-rubbed with beautiful metallic pigments that accentuate the leather's natural characteristics and unique texture of each individual hide.

CHARACTERISTICS:

These Aniline leather hides will exhibit natural characteristics such as healed scars, scratches, and fat wrinkles.

As an Aniline leather, Brushed Metallic Cowhide leathers do not have the full coverage of a pigmented formula as a Finished leather does; there will be natural variations in color, tone, and texture and each hide's unique history and natural markings will be highlighted.

As a Hand-Rubbed leather, there will be some variation in coloration and heaviness of the Hand-Rubbing effect within a hide and from hide to hide.

A sample of Brushed Metallic Cowhide is not necessarily representative of the overall coloration, effect, and characteristics of an entire hide.

A

A: Permanent natural creases on the hide caused by fat deposits in the live animal usually found in the neck, shoulder, and belly area.

FAT WRINKLES

B

B: Brushed Metallic Cowhide leathers are Hand-Rubbed leather, therefore there will be some variation in the coloration and boldness of the rubbed effect within a hide and from hide to hide.

VARIATION IN HAND-RUBBING

C

C: Healed wound during life of animal which is characterized by raised surface and inconsistent grain.

SCARS
