PRODUCT DESCRIPTION:

La Scala Damask is a full-aniline cowhide that is gaufage-embossed then Hand-Tipped with multiple colors and effects that enhance the bold color and distinctive pattern.

Townsend Leather hand-crafts La Scala Damask Cowhide in large center cut hides or sides in gleaming hues and hand applied striations.

CHARACTERISTICS:

Gaufrage is a unique embossing process that creates upholstery leather of exceptional softness and beauty. The design impression is transferred to the leather by an engraved roller under high heat and low pressure for a soft natural hand without pattern match lines.

The characteristic finish effect of this leather artwork is applied by hand; the resulting variance in design and color are part of its natural beauty. With the hand-crafted nature of this product, variation in color and texture should be expected as part of the natural beauty of this leather.

As an Aniline leather, La Scala Damask Cowhide does not have the full coverage of a pigmented formula as a Finished leather does; there will be natural variations in color, tone, and texture and each hide's unique history and natural markings will be highlighted.

As a Hand-Tipped leather, there will be some variation in coloration and boldness of the tipping effect within a hide and from hide to hide.

A sample is not necessarily representative of the overall effects of this leather.

Due to lack of full finish coverage, this product type is subject to more soiling, fading, and wear.

A

A: La Scala Damask Cowhide is an Aniline leather, with no consistent surface pigments; there will be natural color shading within a hide and from hide to hide.

COLOR VARIATION

B

B: Leather is a natural product, therefore it may take the embossing effect differently from area to area and therefore, there will be some variation in the depth of the embossed pattern print. This variation is controlled as much as possible.

EMBOSSING PATTERN DEPTH

C

C: La Scala Damask Cowhide is a Hand-Tipped leather, therefore there will be some variation in coloration and boldness of the tipping effect within a hide and from hide to hide, due to its hand-crafted nature.
