

SHANTI COWHIDE

PRODUCT CHARACTERISTIC SHEET

PRODUCT DESCRIPTION:

Shanti Cowhide is aniline-dyed, Finished cowhide with super softness and a subtle pearlescent finish that highlights the smooth, natural grain of this select hide.

Shanti Cowhide is part of our Namaste Collection, created to be soft in touch and color, inspired by the quiet beauty of nature and our connection to it through the practice of yoga and to encourage a sense of calm and balance through interior designs.

CHARACTERISTICS:

Being a natural product, Shanti will exhibit some natural characteristics such as healed scars, veins, neck wrinkles, and grain variation throughout a hide and from hide to hide.

Super softness.

A pearlized sheen which lends beauty to the relaxing and calming colors offered.

As a Finished leather, there will be durability and built-in protection from soiling, fading, and wear.

Natural variation in grain texture throughout the hide and from hide to hide.

FAT WRINKLES

A: Permanent natural creases on the hide caused by fat deposits in the live animal usually found in the neck, shoulder, and belly area.

LOOSE GRAIN

B: Loose grain is characterized by large "breaks" in the density of the grain visible on the surface of the hide. Generally-speaking, loose grain is often found towards the perimeter of a hide.

TIGHT GRAIN

C: Characteristic wherein the grain structure visible on the surface of the hide is more uniform and "tight." Tight grain is generally preferred and found more consistently towards the interior of the hide.

VEINS

D: Characterized by many clearly visible blood vessels, either closed or cut open by splitting or shaving operations.
