

SHIMMERING SUEDE

PRODUCT CHARACTERISTIC SHEET

PRODUCT DESCRIPTION:

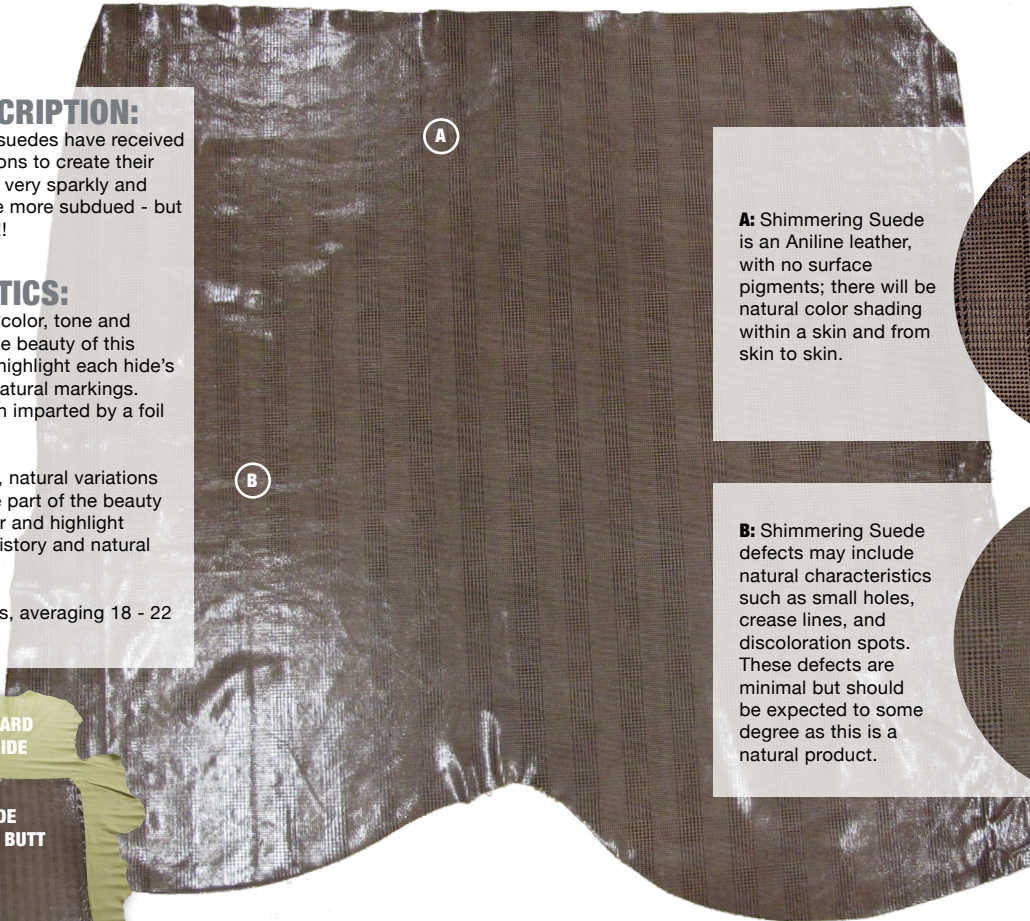

These genuine split suedes have received various foil applications to create their final look - some are very sparkly and flashy and others are more subdued - but all are very beautiful!!

CHARACTERISTICS:

Natural variations in color, tone and texture are part of the beauty of this leather artwork and highlight each hide's unique history and natural markings. The pattern has been imparted by a foil transfer.

As an Aniline leather, natural variations in color and tone are part of the beauty of this natural leather and highlight each skin's unique history and natural markings.

These are small skins, averaging 18 - 22 SF in size.

A: Shimmering Suede is an Aniline leather, with no surface pigments; there will be natural color shading within a skin and from skin to skin.

B: Shimmering Suede defects may include natural characteristics such as small holes, crease lines, and discoloration spots. These defects are minimal but should be expected to some degree as this is a natural product.

COLOR VARIATION

DEFECTS

Many patterns and styles are available, see www.townsendleather.com and search for Shimmering Suede for current selections.
